SUMMARY

Passionate Frontend Developer with 2.2+ years of experience building dynamic, responsive dashboards and management software using React.js, Recoil, and SWR. Skilled in JavaScript, Redux, and UI/UX design, with a track record of delivering high-quality code in Agile environments. Proven collaborator with cross-functional teams to achieve seamless API integrations and performance optimization. Eager to drive innovation in user-centric projects

SKILLS

- ReactJS
- JavaScript
- Redux
- Tailwind Css
- Bootstrap
- CSS 3, HTML5
- Next JS
- Recoil
- Git
- SWR
- Material-UI (MUI)
- Agile Development

EXPERIENCE

10/2023- present

WEBANDCRAFTS

Software Developer

- Delivered four custom **dashboards** for client **management** applications.
- Implemented **Recoil** for **state management** and **SWR** for efficient data fetching, improving app performance and user experience.
- Developed high-performance client dashboards with **Vite**, **React**, **Tailwind** CSS, and **SASS** for responsive designs in management software.
- Collaborated with **Python**, **PHP**, and **Node.js** teams for seamless API integrations, enhancing project functionality and delivery.

01/2023- 10/2023

TECHSMEW TECHNOLOGIES

Software Developer

- Conducted code reviews and provided constructive feedback. Utilized **React Redux** for scalable state management.
- Worked in an **Agile Development**, driving collaborative development and iterative product delivery.
- Succeeded in high-pressure environments, consistently achieving results within tight deadlines.

06/2022- 12/2022

MAITEXA INFOSOLUTIONS

Junior Front End Developer

Developed responsive user interface components using React concepts in a **collaborative team setting**.

Proactively embraced **new technologies** and continuously drove innovation and efficiency throughout projects.

Collaborated with **cross-functional teams** to design and implement intuitive user experiences, leveraging cutting edge frontend technologies.

EDUCATION

06/2019– 03/2022	BACHELOR OF TECHNOLOGY [B- TECH] Mechanical Engineering Government Engineering College Wayanad	CGPA : 7.31
06/2016– 03/2019	DIPLOMA Mechanical Engineering Government Polytechnic College Palakkad	CGPA: 8.57
06/2014– 03/2016	HIGHER SECONDARY EDUCATION Computer Science H S S Kattukulam	85.85%

PROJECTS

CUBESIMPLE COMPANY WEBSITE

Company website for CubeSimple, empowering businesses through digital transformation .

- Developed responsive user interfaces using **ReactJS** and **Tailwind CSS**, collaborating closely with the Laravel backend team.
- Translated design **mockups into interactive web pages**, ensuring a fluid and engaging user experience.
- Contributed to the **optimization** of web application **performance** through efficient coding practices and implementation of best practices, resulting in improved user experience and reduced loading times.
- Utilized effective **planning skills** to manage project tasks and deadlines.

FINOPS FINANCIAL MANAGEMENT

Financial Management Application .It has various features, including expense management, investment tracking, and more.

- Contributed significantly to the React frontend team in building the FinOps financial management application.
- Collaborated with backend engineers to design seamless **API interactions**, enhancing user experience and data accuracy.
- Played a key role in **user interface design**, ensuring a visually appealing and user-friendly experience for the Financial Management Application. Worked closely with designers and stakeholders to translate user needs into intuitive interfaces..
- Developed and integrated **React RTK** state management for efficient handling of complex financial data.

TECHSMEW TECHNOLOGIES WEBSITE

Innovative IT Services and Consulting company website for TechSmew Technologies .

- Implemented dynamic and user-friendly interfaces using **React JS** and **Bootstrap**, amplifying the company's digital presence.
- Collaborated extensively with **cross-functional teams to seamlessly integrate frontend with Laravel backend**, ensuring seamless data flow.
- Implemented **responsive Designs**, enhancing user accessibility across various devices and screen sizes.
- Leveraged optimization techniques to enhance website performance.
